Topic:

"The internet could be a very positive step towards education, organization and participation in meaningful society"

Essay:

Today we live in society where information means everything. ~~The easiest way~~ Internet is the easiest way to find information. This technology does a lot for people around the world every day.

In my opinion, <sup>internet</sup> is a really good thing when you need to share information quickly, so it is a step towards meaningful society. By internet people can ~~make~~ study new things, learn about other civilizations. People are learning how to tolerate differences, see minds and not just bodies. Internet can bring people together.

I want to add charity as example for my words below. Internet became the place when people can talk about their own problems or about their friends' problems or they can give information about people they don't even know and ask for help. People will donate money and offer help. It is a step towards participation in meaningful society.

I would like to add covid pandemic as an example of how internet ~~can~~ could be a positive step toward education in meaningful society. In 2020 we used to study at home and ~~often we~~ we often asked internet for help. Textbooks just don't have enough information and it's okay to use modern technology, such as internet, for help.

In conclusion, internet brings information to people's minds, it teaches people about education, organization and participation in society. We should let internet teach us.

The Internet has always been about connecting people around the globe. Soon from its launching it became the Internet that we know today. It had a great impact on ~~the~~ world <sup>in past</sup> and still influence us.

As a person that believe in strength and importance of technological progress<sup>50</sup> and science, I can fully agree with Noam Chomsky. The Internet indeed is a positive step towards education organization and participation in ~~meaningful~~ society. Because it gives so much opportunities to develop a better education and society. Also, it's way more convenient. You can easily access ~~a~~ all humankind's knowledge on any device that has one of modern search engines and access to the Internet.

Looking back in recent history, we can see that the Internet has taken advantage over society and education. For example, modern pupil or student can easily find information they need and citizen of a country can see various statistics of their country and say something about it on the Internet.

Thus I can conclude, that the Internet has a positive impact on society and education.

Writing.

The internet became a part of ~~our~~ <sup>or</sup> our every day life. Most of us are even addicted to it. It is hard to tell whether the internet is good for us or not. I personally think that there are more good things about it. With <sup>the</sup> internet you have got tons of ways to learn something new, find friends and discover things. You can also become whoever you want using the internet. I can explaining with examples. <sup>Ar</sup> <sup>Ar</sup> <sup>Ar</sup>

A few years ago I started to get interested in art. I knew almost nothing about it so I have searched about it on internet. I found ~~lots~~ <sup>lots</sup> of tutorials and articals about <sup>Ar</sup> <sup>Ar</sup> <sup>Ar</sup> drawing and art in general. It helped me to improve my skills. Now I can't imagine myself without this hobby.

Another example is a story about me and my best friend. We met online and started chatting. After a few months of our friendship on social media we finally met in <sup>Ar</sup> <sup>Ar</sup> <sup>Ar</sup> real life. If there were no internet, I wouldn't meet such a nice person.

All these things explain why I think the internet is great. Of course it has negative aspects and can impact badly at someone, but still in my opinion internet helps us every day and is not a bad thing in general. It is all about how we use it.

## Writing.

Our life will never be changed. Nowadays are different with last centuries because of new technologies, progress in community according to innovating the Internet.

We can't imagine our lives without the Internet. Every day we depend on it. We wake up and search new information or maybe read news on our mobile phones. Every day we chat with our friends in messengers. And exactly we don't understand how can we live without networking?

But there are many meaningful reasons why we would need the Internet. Network is a large system of many users including states of government lots of countries. It delivers information in any local you want to message it. In fact the Internet is the largest step in history that ever had. It functions also in many technologies. The Internet is an important reason why we would step forward in progress.

According to history a century ago the Network was used only in military because of its speed delivering information comparing with technologies those times. It was very fast for that century without this technical scientist recovering that we have now.

But this type of networking mines also. The information that is delivered on all of the world can be very dangerous for people. It can be participating in terrorism and etc. This kind of ideas effect on people not best ideology. So governments have to watch what kinds of information is delivered on their territory.

Making a conclusion, I can say that the Internet can be very dangerous. But also it makes our life more progressive.

Nowadays, people used to use the Internet as a way to develop and improve their personality. That's because it has a lot of information that can be used by people, who want to invest in their future <sup>using</sup>

I think that <sup>using</sup> the Internet is a good way to have study. That's because people live not only in towns, but they can also live in the suburbs, where they can't have a good education. The Internet is the ~~easiest~~ easiest way to have education in this situation. Also, it can be seen that the Internet has a lot of resources, which can be useful for people, who want to study.

Giving the examples I can note, that my friend ~~is~~ is getting a good education because of the Internet. In fact, she lives in a small village, that located next to the forest, so the population of this place is quite small, therefore this village doesn't have any of universities or schools. In such a situation she decided to study in the internet. Now she's getting an education in the online school and she is very happy that she found this school.

In conclusion, I want to say, that there are a lot of ways to have a good education, but I think, that using the internet is the best way to have that one.

## Writing

The Internet is a thing that sometimes helps people and sometimes not. It depends from ~~the~~ it using.

I think the Internet was planning like something that can help people with different things [such as „...education, organization and participation in a meaningful society.“], just like Noam Chomsky said. And it helps! But not every time...

There are many people who use Internet wrong. They play bad computer games, watch cruel videos. And for what?! Just for their fun. They use Internet ~~with~~ which can EVERYTHING for nothing!

But, of course, there are people who use Internet right. They use it for example for: searching some statements for their projects or just because they intrested in it; learning a lot of new things or a lot of new ideas; lerning foreing languages, because internet and a lot of mobile apps or watching various films or videos can give them enough practice in it.

Personaly, I always use Internet when I need to do some school tasks, like projects and presentations. There I can find a lot of interesting facts and maybe some stories that can help me to do ~~the~~ these hometasks. ~~With~~ With it I can do my presentations, colorful and projects more interesting than if I will do it without Internet.

Also I use Internet to communicate with English ~~or~~ or Korean native speaker, because I interested in these foreing languages, and I want to improve them. People from different contries do it too, also practicing foreing languages with native speakers. So the Internet is also a useful thing for many people different nations and from different countries.

Nowadays

Essay

~~Now~~ you can use the Internet as much as you can and it can both good and harmful ~~and~~ impact. ~~It~~ According to the ~~phrase~~ Noam Chomsky's phrase using the Internet is good step for students, some organizations and participation in a society. But is it true?

Personally, I would share his opinion, because <sup>of</sup> the Internet is the most important tool in student's daily routine. Sometimes it can help you with homework or you can study by online lessons or videos. Also it's really helpful in communication ~~and~~ among teens.

I can give some examples to illustrate my reasons. For instance, you need to prepare presentation for tomorrow's lesson and you don't have enough time to find this information in books, so you easily can find it on the Internet spending less than 10 minutes. As for another example, imagine that you have test tomorrow but you don't really understand this topic, so you find some videos or Youtube ~~or~~ (for example) or use information on sites. I think it's really helpful for every pupil.

In consequence, I don't really realise our generation without ~~any~~ the Internet. But, unfortunately, it has its disadvantages. In fact, we spend a lot of time ~~with~~ on Internet ~~without any~~ useless, but at the same time we learn a lot of really ~~useful~~ helpful stuff.

I can't disagree with following quotation. Internet can take a really good influence on people. 16

When you surf the internet, you can learn something new. Also, students can prepare for exams and adults can find a job. Technologies is a good way to communicate with other people. I'll say more, you can make friends from another city, region or, maybe, country. Almost every day we share news and other information using our mobile phones or computers. I will give two examples of positive internet's influence using my personal experience. +

First example is my studying at online-school. It is great, because it doesn't take me any time to go to school. I just listen classes and do my homework after that. Also, teachers are young and ready to help you with any issues. My best friend is taking education like this too. In my opinion, it is a very effective way to learn something and to prepare for exams.

Second example is that my classmates and I get information about school events, different competitions and our achievements from our group. Our teacher shares all of this with us, so organization is good.

As a result of my writing I can say that Internet is a meaningful thing. +
