

LISTENING

Time: 10 minutes (5 points)

Listen to a conversation between an interviewer and a respondent talking about smartphones and then do the following tasks.

There are several idiomatic or phrasal expressions that interviewer and respondent are using in their dialogue. Here are some other situations where these expressions could be used. Please finish the following sentences with these expressions.

Mind: these sentences are NOT from the dialogue between interviewer and respondent.

You may need to change some pronouns and the grammatical form of verbs.

You will hear the text twice.

Now you have 1 minute to read the tasks.

1. My plants are very important to me, so, when I am away, they should be watered _____. (4 words)
2. There are so many different holidays in Russia these days. And we _____: every holiday deserves celebration. (3 words)
3. If you are using your phone all the time people may say that you are _____. (2 words)
4. Tatiana is _____ and performing songs in English language so she organizes her own concerts at school. (3 words)
5. I guess I need to ask someone with a little more experience in biology to _____ with this school project. (3 words)

Transfer your answers to the answer sheet!

READING

Time: 40 minutes (20 points)

Read the extract below and answer questions 6–15.

A. The way we live today has been revolutionised by the internet and modern computers. We can gain access to the whole world with just a single click of a search button. However, it is not always clear if such technological developments have a positive impact on us. On the one hand, the Internet definitely acts as a force for good and progress, but on the other hand it can be also used to spread hate and misinformation.

B. The technology behind the Internet and how people interact online are studied by Web Science. Among various researches to explain how the web works, Web scientists also try to find out if it is possible to make the Internet better for humanity in the future. This question was discussed during the annual. Web Science conference which was held online due to the coronavirus situation. "How to make the web human-centric" was the theme of the conference.

C. Dame Wendy Hall, co-founder of Web Science discipline, was one of the key speakers of the conference. In short, her presentation put forward the idea that science studies the web not just as a technology, but as a collective creation of society. It is people who interact with the technology, the platforms and the social media networks to put the content on.

D. Social media networks are the perfect examples of the exchanges between humans and the Internet, mentions Hall at the conference. People always use websites, apps and computer programmes on their electronic devices to communicate and share information. Web Science takes this approach to the technology and studies the Internet as an ecosystem — a complex system of relationships and influences that exist between all living things and their environment.

E. Covid contact tracing app is a great example of websites designed to helpfully interact with humans. This mobile phone app is used to combat coronavirus by tracking

movements and contacts between people. On the surface, it seems to be a useful practical application of Internet technology. However, when it comes to the Internet, things are never that simple.

F. Some scientists claim that there are still a lot of questions about the effectiveness of digital technology behind the app. For example, it uses Bluetooth to detect contact between two people. However, it is doubtful if this is doing what it says on the tin as the tests show the opposite. All in all, it is still unclear if such anti-coronavirus apps work in the way we want and if we get the public health information we need.

Task 1.

For statements 6–8, choose TRUE if the statement agrees with the information given in the text; FALSE if the statement contradicts the information given in the text, or NOT STATED if the information on the statement is not given in the text.

6. Nowadays the Internet is mostly used to spread hate and misinformation.
7. Researches and Web scientists are constantly looking for ways to make the Internet help the society.
8. Nowadays the Internet is seen as a system of people, websites and their content, but not just as a technology.

Task 2.

For questions 9 – 11, choose option A, B, or C which best fits according to the text.

9. *Which definition of the Internet is the best according to Wendy Hall?*
 - A. The Internet is a force for good and progress.
 - B. The Internet is a complex system of relationships and influences that exist between all living things and their environment.
 - C. The Internet is a technology that is not only seen as helpful for people, but also as a platform to spread hate and misinformation.
10. *According to the article, what Covid contact tracing app is designed for?*
 - A. to track contacts between people
 - B. to helpfully interact with humans

C. to combat coronavirus

11. *According to the article, some scientists say that*

- A. Covid contact tracing app is not effective
- B. Covid contact tracing app is very effective
- C. There are still some doubts about the effectiveness of Covid contact tracing app

Task 3

Guess the words from the text by their meanings. The paragraph is given in the table.

12	Paragraph A (1 word)
13	Paragraph B (1 word)
14	Paragraph E (2 words)
15	Paragraph F (1 word)

1	wrong information, or the fact that people are misled
2	an event, sometimes lasting a few days, at which there is a group of talks on a particular subject, or a meeting in which especially business matters are discussed formally
3	the act of using something for a particular purpose
4	a brand name for a system for connecting electronic equipment such as mobile phones, computers, and electronic organizers to each other and to the internet using radio signals

Writing.

Around your country. A-8-1 London Street.

Have you ever wanted to travel around Britain? If yes, take our traveling club as solution. Our club travels from the southern England to northern Scotland or even Ireland! You can choose where you want to travel. This club is totally free. We accept people of the age of 12 to 22. In our plans, we want to visit every single part of the UK. There are different ways to travel: e.g. by bike, on bus and some others. We usually start travels in the morning like in 10:00 am. Talking about duration, each season, we don't have exact answer, it all matters where we travel. It may take from a few hours to a few weeks. And we're arriving back mostly in the evening in 6:00 pm. And the benefits are just a good experience, hanging out with friends and learning something new about Great Britain. In the end we need to tell that you have a chance to do all that and have a good time. It's ok if you don't want to, but keep in mind.

Have a good day!
